

Colin Owen Recording Facilities

His Place is based in a house and so has a good relaxed working atmosphere. The studio is based around a Mac G5 computer running Logic Audio with 8 audio outputs and almost unlimited Midi.

Please note:

I can not accommodate real drums, or really loud instruments, but should you need this, I can take you into a local studio.

Work undertaken:

Musical arrangements for your songs/projects. Any style etc.

Full album production. I have many years experience as an engineer and producer.

Mastering. I can master your music onto CD with full optimisation and level maximising to full Red Book Standard.

Editing. Hard disc or tape.

Cleaning up old recordings. Audio restoration.

Copying almost any medium to CD/DVD etc.

Encoding for the internet, MP3, Real Audio etc.

Video editing and transfer to DVD.

Custom Music written for any media or event royalty free.

Fees are:

£20.00 per hour to include myself as programmer/session musician and engineer.

£15.00 per hour for editing, mastering etc.

Accommodation is free, but meals are not provided (I'm a lousy cook!). There are plenty of local eating houses within a 2 minute walk. Contact me first for availability.

About me.

I've worked with music and recording since I was 11, so lots of know how.

I'm born again, Spirit filled and anointed to do the work I do. It's my ministry.

I bring my own anointing to your music.

I have a known track record, and satisfied client list. See my web site.

Contact.
